

## ISO 50001: 2011 ENERGY MANAGEMENT SYSTEM — INTRODUCTION

**COURSE DURATION: 1 DAY**

### COURSE OVERVIEW

This one-day course provides the essential foundations for planning an ISO50001: 2011 Energy Management System. Designed for organisations who are considering implementation, it introduces delegates to the concepts, requirements and benefits of this globally recognised standard.

### WHO IS IT FOR?

- Business owners and managers with a responsibility for or interest in improving energy performance and energy efficiency within an organisation.
- Business owners or managers who have implemented or managed an EMS such as ISO14001 and want to introduce ISO50001 as part of an integrated management system (IMS).

### BENEFITS

Delegates will learn how to use, develop and manage energy policies and procedures that will:

- Reduce your energy costs and performance.
- Meet environmental targets and legal requirements.
- Improve industry and customer recognition.
- Build awareness and understanding of efficient energy management.

### COURSE CONTENT

- Overview of ISO 50001: 2011 – Importance and benefits
- Key requirements, terms and definitions of ISO 50001: 2011
- Structure of ISO 50001: 2011
- Main concepts:
  - Risk-base thinking
  - Process approach
  - Plan-Do-Check-Act
  - The 7 management principles
