

COURSE DURATION: 2 DAYS

COURSE OVERVIEW

Implementing an ISO 50001: 2011 Energy Management System will support you to reduce energy costs, meet environmental targets and achieve legal compliance.

This course introduces you to the key concepts and principles of ISO 50001: 2011. You will learn how to interpret the standard's requirements in relation to your operations and conduct a gap analysis of your existing systems. We will guide you through the steps to plan, document and monitor an energy management system that will achieve consistent improvements in your energy efficiency and compliance with legislation.

WHO IS IT FOR?

- Business owners and managers with a responsibility for or interest in improving energy performance and energy efficiency within an organisation.
- Business owners or managers who have implemented or managed an EMS such as ISO14001 and want to introduce ISO50001 as part of an integrated management system (IMS).

BENEFITS

This course will help your organisation to:

- Identify the key benefits of implementing an effective EnMS.
- Review existing arrangements against the standard's requirements
- Develop a plan and determine the resources required for implementation.
- Use proven tools and techniques to support implementation.
- Prepare for certification

COURSE OBJECTIVES

By the end of this course delegates will be able to:

- Interpret ISO50001 requirements.
- Identify the resources needed to implement ISO50001.
- Define, plan and implement a ISO50001 energy management system.
- Develop energy policies, processes, targets and measuring techniques.
