WEBINAR

2nd March 2022
START TIME 15:30 - 16:30

How to prepare for your first ISO audit?

This short webinar is designed to highlight some of the key clauses of **ISO 9001**, **ISO 45001** and **ISO 14001** quality, health, safety and environmental management systems. You will learn what to expect when being audited and how to best prepare for third-party audits.

Ian Fielding AIOSH ^{Tec} MIIRSM, NDC Certification Services lead auditor, will explain what auditors look for when conducting site audits, and highlight what documented evidence is required to satisfy the requirements of each standard.

Ian will also discuss how to best demonstrate effective management of your critical assets, from heavy plant and work equipment, to vehicles and chemicals.

This is the first in a series of short workshops that are designed to help those who are new to ISO standards and auditing.
