

# ISO14001 Certification Scheme

## ISO14001 CERTIFICATION SCHEME

Our ISO certification scheme demonstrates that your organisation is working to ISO14001 which is widely accepted by most organisations. Registering with our certification scheme will bring significant cost savings over the life span of your environmental management system. It's designed for companies who wish to demonstrate conformity to the standard without committing to the initial and ongoing certification costs that are associated with a UKAS accredited scheme.

No matter where you are on your environmental journey, if you're awarded one of our own ISO14001 certificates it means you have met the requirements of the standard. You will receive a 'Certificate of Conformity' which can be used on your stationary and website. You can transition from our non-accredited scheme to a full UKAS accredited scheme at any time. Simply let us know, and we can assist you with transition.

If you're unsure whether you require UKAS accredited certification, please contact us and speak to one of our qualified lead auditors to discuss your requirements further.

## THE BENEFITS OF OUR SCHEME

One of our consultants will visit you to conduct an ISO14001 GAP analysis. This enables us to identify where your business is now, where it needs to be and how many consultancy days may be required to reach certification. Once completed you will receive a full report detailing your next steps and what you need to do to meet the requirements of the standard.

Our certification scheme includes, but is not exclusive to:

- ISO14001 GAP analysis
- On-site and off-site support
- Significant cost savings
- Pathway to full UKAS certification
- Use of our ISO14001 logo and certificate
